Creating Translations for Data Collections

Introduction

EDI Cross-Reference Rules Page (SOAXREF)

Cross-Reference Rules

Use the EDI Cross-Reference Rules Page (SOAXREF) to translate the EDI value to the Banner value. For data collections, this page establishes the translation of institutional Banner values to standard Regents values.

EDI Value	Electronic Label	Electronic Value	Banner Value
JR	<input checked="" type="checkbox"/>	JR	Junior
SO	<input checked="" type="checkbox"/>	SO	Sophomore
SR	<input checked="" type="checkbox"/>	SR	Senior

The **Electronic Label** field contains the labels previously entered on the EDI Verification Label Validation Page (STVXLBL).

The **Electronic Value** field contains the Regents value for the translation. These codes are listed in the Valid Values Sections of the DED and/or the Cognos Reference Code Reports.

The **EDI indicator** denotes codes that are used by electronic data exchange (EDI) processes for transmitting data.

The **Web indicator** is used for codes that will display on the Self-Service Banner webpages. The Web indicator is not used for data collection.

The **XML indicator** should be checked for PESC/XML standard codes. These are items such as the Postsecondary XML Transcript that uses a standard established by the Postsecondary Electronics Standards Council (PESC) to transmit data via XML. The XML indicator is not used for data collection.

The **Banner Value** field contains the institutional value for the translation for codes in use at the institution. The Description field contains a brief description of the translation. Use a variation of the element title listed in the DED for easier reference.

You must use the Electronic Qualifier when your institution has more than one institutional Banner value for the same EDI Value/Regents value. Use a qualifier when you need a many-to-one translation.

Cross-Reference Rules

Electronic Label	Electronic Value						
RGTRSTS 1	CNTENRLN	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	CC	Course Cancelled	
RGTRSTS 2	CNTENRLN	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	DC	Course Drop	
RGTRSTS 3	CNTENRLN	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	DW	Withdrawn Course - W	
RGTRSTS 4	CNTENRLN	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	DD	Withdrawn Course - WF	
RGTRSTS 10	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	W	Withdrawn - Military	
RGTRSTS 11	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	WC	Withdrawn Student	
RGTRSTS 12	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	WF	Withdrawn - Military	
RGTRSTS 13	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	WM	Withdrawn - Military	
RGTRSTS 14	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	WS	Withdrawn Student	
RGTRSTS 15	CNTENRLY	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	WH	Withdrawn - Hardship	

1 of 2 Per Page Record 1 of 15

SAVE

For example, the Electronic Label RGTRSTS and Banner Values CC, DC, DW and DD map to Electronic Value CNTENRLN. The numeric qualifiers 1, 2, 3 and 4 are used to map all four institutional values to the Regents EDI Value of CNTENRLN. Qualifiers may be any alphanumeric value (i.e., A, B, C and D or N1, N2, N3 and N4) as long as a unique qualifier is used for each Banner value.

NOTE: Multiple Banner Values may be cross-referenced to a single Electronic Value, but a single Banner value may not be mapped to multiple Electronic Values. (i.e., Banner Value CC in the example above may not be mapped to both CNTENRLN and CNTENRLY.) This will result in an error in the Academic and Facilities Inventory Data Collections Data Collection ETL.

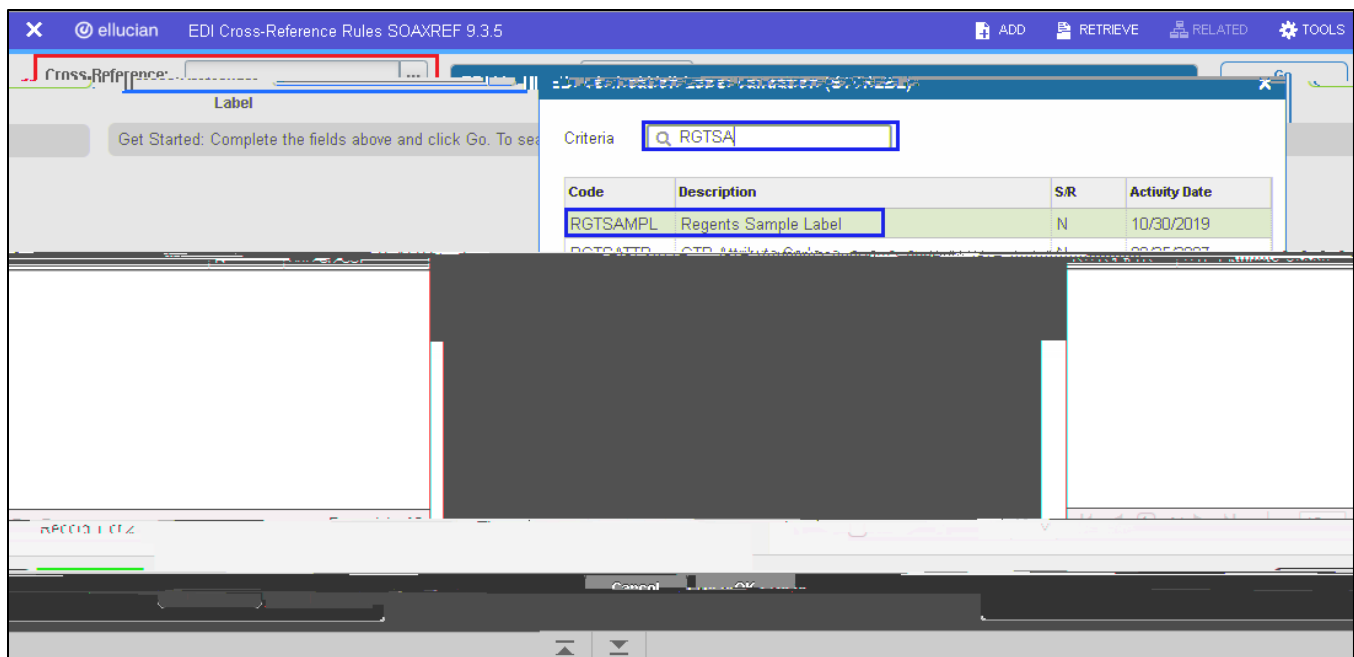

Procedural Steps to Create EDI Translations

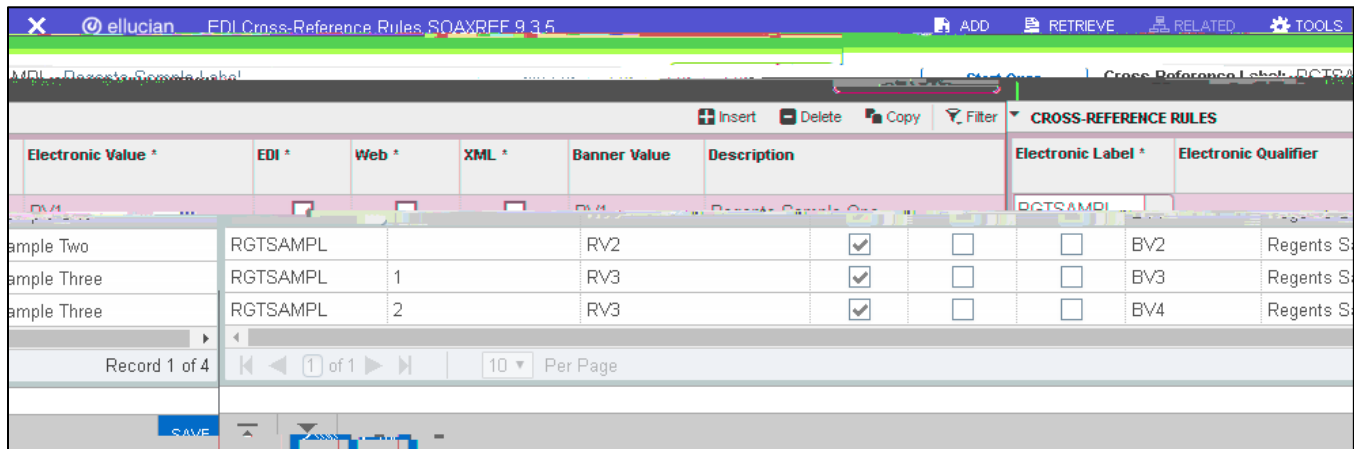

Set Up Valid EDI Codes on STVXLBL

To set up valid Regents codes in Banner, complete the following steps:

- en•

- The Cross-Reference Label field will be populated with the selected EDI Label code.
- Click Go.

- Enter the Regents value as listed in the DED Valid Values field.
- The EDI flag should be checked.
- Enter your institutional code in the Banner Value field.
- Enter the Description as listed in the DED Valid Values field.
- Use the Electronic Qualifier field when multiple institutional Banner codes map to one Regents code. In this example, Banner Values BV3 and BV4 are both mapped to Regents value RV3.
- Save the entries by clicking the SAVE button.

2. Manually replace the copied data with your new data (Code, Sequence, Group, External Code, Description). Leave the Sys field blank.
3. Save the record.

Email Crosswalks

Institutions may collect and use multiple student email address types including home email address, other email address, parent email address, etc. Email address types are defined on the E-mail Address Type Validation page (GTVEMAL). For data collection purposes, the Enrolled Student Current Email Address and Graduation Email Address types must be translated.

Translate Institutional Codes to Regents Codes on GTVSDAX

To establish the translation of institutional email address codes to Regents codes, complete the following steps:

- Create email address type validation codes on the E-mail Address Type Validation page (GTVEMAL).
- Establish the email address hierarchy on the Crosswalk Validation page (GTVSDAX 0.005()-8 (G)2d(Tj/T8 (C

For illustration purposes, if an institution collected two permanent addresses with email address type codes HOME and PERS, the following entries would be made:
